Transversality in Anthropology – Updates on methodologies, technological developments and discoveries

Organized by the Biological Anthropology UISPP Commission

(Dominique Grimaud-Hervé¹, President; Carlos Lorenzo², Vice-President; Julie Arnaud^{1,3}, secretary)

¹UMR 7194 – HNHP, MNHN (France) - dominique.grimaud-herve@mnhn.fr

²Area de Prehistoria, URV, IPHES (Spain)- carlos.lorenzo@urv.cat

³Dipartimento di Studi Umanistici, UNIFE (Italy) - julie.arnaud@unife.it

The study of the biological aspect of ancient populations is in a constant modernization and implementation, through the improvement, application or adaptation of methodologies and most of all by the discovery of new fossils. It is no coincidence that, in recent decades, technological advances in biological anthropology have allowed us to clear some aspect of human evolution and migration.

In this context, the UISPP commission “Biological Anthropology” proposes a session which embrace all the anthropological field of study to maximize the participation of anthropologists from different horizons in order to stimulate debates and arouse curiosity. In this broad range of topics, a special focus will be given to anthropological studies of North-African prehistoric populations.

In this sense, we highly encourage graduate students and junior researchers to present their current research in order to update the community of anthropologists about what is going on in the anthropological sciences.

Authors can send poster or oral proposal on a broad range of chronological, geographic, theoretical or methodological topics. The session might be subdivided in sub-sessions in function of the different topics proposed by the authors.

The deadline for the communication proposal has been fixed to the **30/04/2020**. You can now send your abstract to the commission secretary: julie.arnaud@unife.it.
